

# Veriato 360®

## THE VISIBILITY YOU NEED – A SOLUTION THOUSANDS OF COMPANIES TRUST

Organizations worldwide use Veriato 360 to protect their assets; monitor highly privileged users; reduce litigation risk and expense; improve efficiency and productivity, and ensure compliance with company policies. Veriato 360 is a comprehensive user activity monitoring solution that enables companies to log, retain, review, and report on employee activity when there is cause to do so. Veriato 360 creates a definitive record of an employee’s digital behavior, and in doing so provides organizations with the ability to see the context of user actions. Which translates into the answers you need, without high false positive rates, in one easy to use package.

### KEY BENEFITS

#### PRIVILEGED USER MONITORING

Highly privileged users (or “super users”) have a disproportionate ability to harm an organization, because of the level of access they have been granted to. By monitoring their activity, you can ensure that the access they’ve been granted is not used improperly. There is no greater risk than a highly privileged user gone rogue.

#### INTELLECTUAL PROPERTY AND CORPORATE DATA PROTECTION

Employees leaving the organization take IP with them when they leave. 1 out of 2 employees surveyed think it is OK to do so. If you are not actively monitoring the activity of employees during this high risk exit period, you are letting your IP and sensitive data (like customer contacts) leave with them.

#### IMPROVING OPERATIONAL EFFICIENCY AND EFFECTIVENESS

Benchmark the activities of top performing employees and departments to identify training opportunities and best practices. Make sure the tools and processes you’ve invested in are being used. Identify the top “time drains” in your organization and implement changes to maximize productivity.

#### KNOW WHAT YOU NEED TO, WHEN YOU NEED TO KNOW

Lever powerful alerting and reporting capabilities to put the answers you need in easy-to-create, easy-to-understand forms. No digging through myriad sources of data; no cobbling together reports. More than 75 out of the box reports, and the ability to create custom reports with just a few clicks.

### PROBLEM

Without accurate information, making good decisions is difficult at best. Not all of the information needed to make the right call is easy to see; organizations typically piece together clues from a multitude of disparate sources in an attempt to assemble a complete picture of what is happening within. Not having a definitive record of the digital activity occurring in your organization leaves you vulnerable to insider threats, increases your litigation risk, and prevents you from improving operational efficiency and maximizing productivity.

### SOLUTION

Collecting data on employee digital activity addresses these problems head on. From early detection of fraud and other insider threats, through more efficient and effective investigations, termination protection, and reduction of HR related risks, to base lining in support of establishing best practices and improving training programs, having visibility into the online and communications fabrics of your organization gives you the information you need to support your corporate goals and objectives.

### WHAT’S NEW

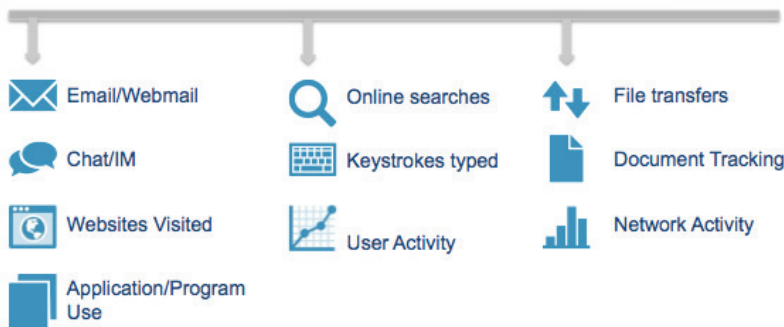

Veriato 360 8.4 adds 9 new out-of-box templates designed to help companies quickly detect & deal with pressing issues like fraud, data theft, insider risk stemming from privileged users, HR policy violations, and more. In addition, new capabilities around recording activity related to personal clouds like Drop Box and Google Drive are included to help companies better detect and deter IP theft and data leaks.

## KEY FEATURES

### DETAILED RECORDING OF DIGITAL ACTIVITY

Veriato monitors, captures and analyzes all user activity...

### POWERFUL EMPLOYEE PRIVACY PROTECTIONS

Though it may seem counter-intuitive, Veriato 360 contains numerous options to maximize the privacy of your employees. From the simple (not recording activity on personal banking sites) to the more complex (masking passwords and user names), Veriato 360 enables you to balance employee privacy and the needs of the organization.

### SECURE STORAGE

All data collected is written to an on-premises SQL database that uses a proprietary database schema. Object level encryption using AES or 3DES ensures the data remains secure.

### ACTIVE TIME, FOCUS TIME

Veriato 360 distinguishes between active time and focus time – so you can know whether an application or website was opened and left idle, or being actively interacted with. This is critical to accurately assessing productivity, and eliminates any questions about what was done, and when.

### ABOUT VERIATO

Veriato is an innovator in actionable User Behavior Analytics and the global leader in User Activity Monitoring. More than 36,000 companies, schools, and government entities worldwide have relied on Veriato solutions to gain insight into the user activity on their network, and enjoy the security and productivity increases that come with it. The Veriato mission is to provide world-class software and support that enables our customers to protect their most valuable assets, reduce their risk, and gain unparalleled visibility into their operations. Veriato's award-winning solutions include Veriato Recon (behavioral analytics based insider threat detection), Veriato 360 (enterprise-grade User Activity Monitoring), Veriato Investigator (employee investigation tool), Veriato Log Manager (event and security log management) and Veriato Server Manager (server management solution).

## ADDITIONAL FEATURES

### INTELLIGENT ACTIVITY DRILL-DOWN

Veriato 360 allows you to quickly find the action in question, so you can spend your time addressing risks impacting the business instead of looking through tens of thousands of actions in a single day.

### ANY DESKTOP, ANYWHERE

Veriato 360 can record activity whether the user is working on a physical or published desktop, a hosted application, or on a virtual machine.

### SCREEN PLAYBACK

Veriato 360 can capture actual screen snapshots, enabling you to replay computer-based actions tied to activity data within context, before, during and after an event.

### LICENSING

Veriato 360 is licensed by monitored end point. Veriato 360 licenses are perpetual. For companies that wish to move licenses around to different monitored end points (commonly found in investigative use cases) Veriato 360 Floating licenses are available.

### SYSTEM REQUIREMENTS

**Recorder** (for computers & laptops being monitored)

- Windows® 8, Windows® 7, Windows Server 2012, Windows Server® 2008
- Mac OS® X 10.9 or higher running on a 64-bit Intel processor
- Network Access (Networked on a Windows Domain, Workgroup, or Novell® Network)
- Administrator share level access to computer for remote installation Control Center

### Control Center

- Windows 8, Windows 7, Windows Server 2012, Windows Server 2008
- Network access to servers, database, PCs, and Macs monitored

### Dashboard

- Windows 8, Windows 7, Windows Server 2012, Windows Server 2008
- Network access to the Veriato 360 SQL instance
- Windows login or login privileges to the Database

### Server Components

- Windows operating system, x32 or x64:
- Windows Server 2012
- Windows Server 2008
- Windows Server 2003
- Windows 8
- Windows 7
- Enterprise class server (Pentium® III / Intel® Xeon®, 8 GB RAM) is recommended for ongoing use, but any newer Windows system is appropriate for evaluation
  - SQL Server Host Server—OS in native English
  - SQL Server Host Server—NTFS file system (not FAT32)
  - Static IP address is recommended
  - 40 GB free disk space
